Venue: **API BHAVANA Auditorium**

**12<sup>th</sup> December 2018 | Wednesday | 12 noon - 5 pm**

Sepsis is the second leading cause of maternal mortality. It can be life threatening to the mother as well as fetus and poses a challenging and arduous task to the obstetrician.

The maternal and perinatal morbidity/mortality associated with sepsis can be averted by the 5Ps - Predisposition, Prediction, Prevention, Perception and Protocolised diagnosis and management.

This CME is intended to increase the awareness and knowledge of OBSTETRIC SEPSIS. the morbidity / mortality can be evaded by being forewarned and for-armed to predict prevent recognize and treat sepsis as a team.

Experienced obstetricians, intensivists, anesthesiologists and microbiologists are sharing their experience in this half day CME programme. Please make it convenient to attend.
